JABIS™ Security Services

January 1, 2009

Computerized Site and Floor Plans for Schools

JABIS provides a service to create computerized school site and floor plans which meet the recommendations of the Texas School Safety Center for a school safety audit. JABIS obtains information from the school and district, but JABIS does all of the data integration and verifies that the data is current.

JABIS is an approved vendor listed in the Harris County Department of Education (HCDE) Catalog. Being an approved vendor assures our customers that they are getting a quality service at a competitive price. Schools can order our services through the Harris County Department of Education without the effort or delay of either a full bid process or a sole source justification since we are an approved vendor. There is no charge to the school district for this service by HCDE.

The cost of a JABIS Security System for an **elementary school** or **middle school campus** is **\$8 per student**, and **high schools** are **\$10 per student**. The minimum charge for a single school is \$2,500. These prices apply to schools within a 225 mile radius of Austin. **For contracts covering 5 or more schools Jabis offers \$8/student for high schools with the \$2,500 minimum per school.** The offer is also open to districts with less than 5 schools that contract for the whole district. Schools districts outside of a 225 radius may incur an additional fee that will be negotiated before the contract dependent upon distance. JABIS reserves the right to “no bid” jobs outside a 225 mile radius.

NEW DISCOUNTS

We have added the following discounts since we became an approved vendor by the Harris County Department of Education. These discounts stop at the minimum cost. These discounts are done on a “by school” basis. To obtain these discounts the architectural files and/or drawings and the drawings showing the schools room names must be transferred before the school is begun by JABIS.

New Architectural Drawing Discounts

Site Plan	Floor Plan ¹	Discount
Vector PDF File ²	Vector PDF File	20%
Vector PDF File	Drawing	15%
Vector PDF File	None	10%
Drawing	Vector PDF File	15%
Drawing	Drawing	10%
Drawing	None	5%
None	Vector PDF File	10%
None	Drawing	5%
None	None	0%

¹. Most main buildings, not portable, sheds, concession stands, etc.

². A “Vector PDF file” is an Adobe Acrobat PDF file created with CAD or other software that uses real fonts and vectors for lines. PDF files created from scanned images are bit-mapped, not vector, files.

Our prices are fixed at the start of the contract, there are no additional expenses.
